Hello!

You just got a new job, and assigned on the earthquake team.
You are asked to create a report that summarizes recent earthquakes.

How many earthquakes in the last 30 days?

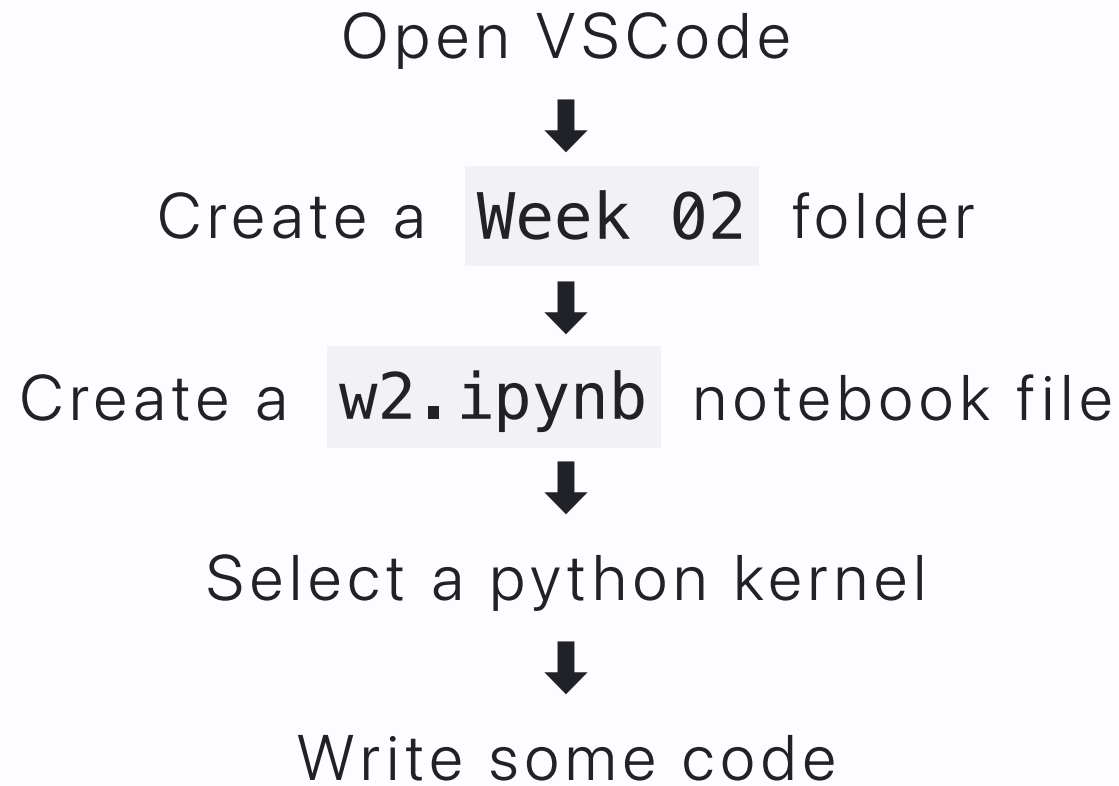

How many earthquakes with magnitude above 4.0?

What does the distribution of earthquakes look like?

Create a map!

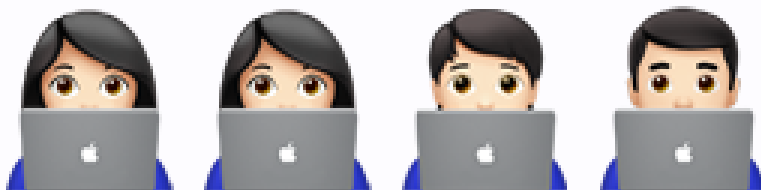

Why do you want to code?

Review from last week

Variables and data types

変数とデータ型

```
name = 'Yoh'
school = 'Reitaku University'
age = 35  # really?
height = 176.5
kids = ['Rio', 'Rui', 'Ren']
full_name = { first_name: 'Yoh', last_name: 'Kawano' }
```

variables

`name = 'Yoh'`

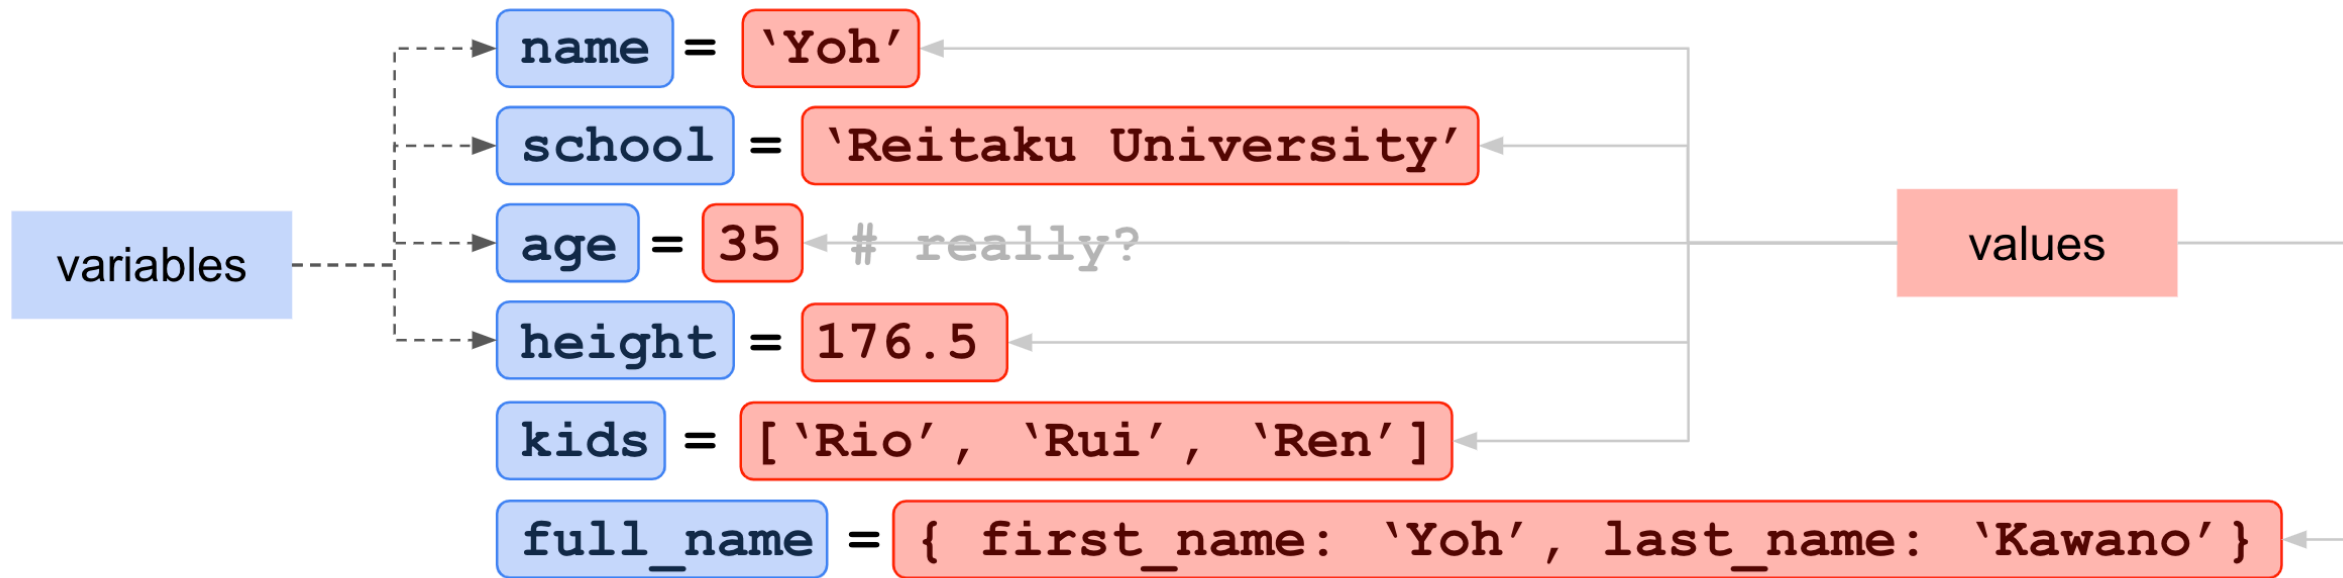

`school = 'Reitaku University'`

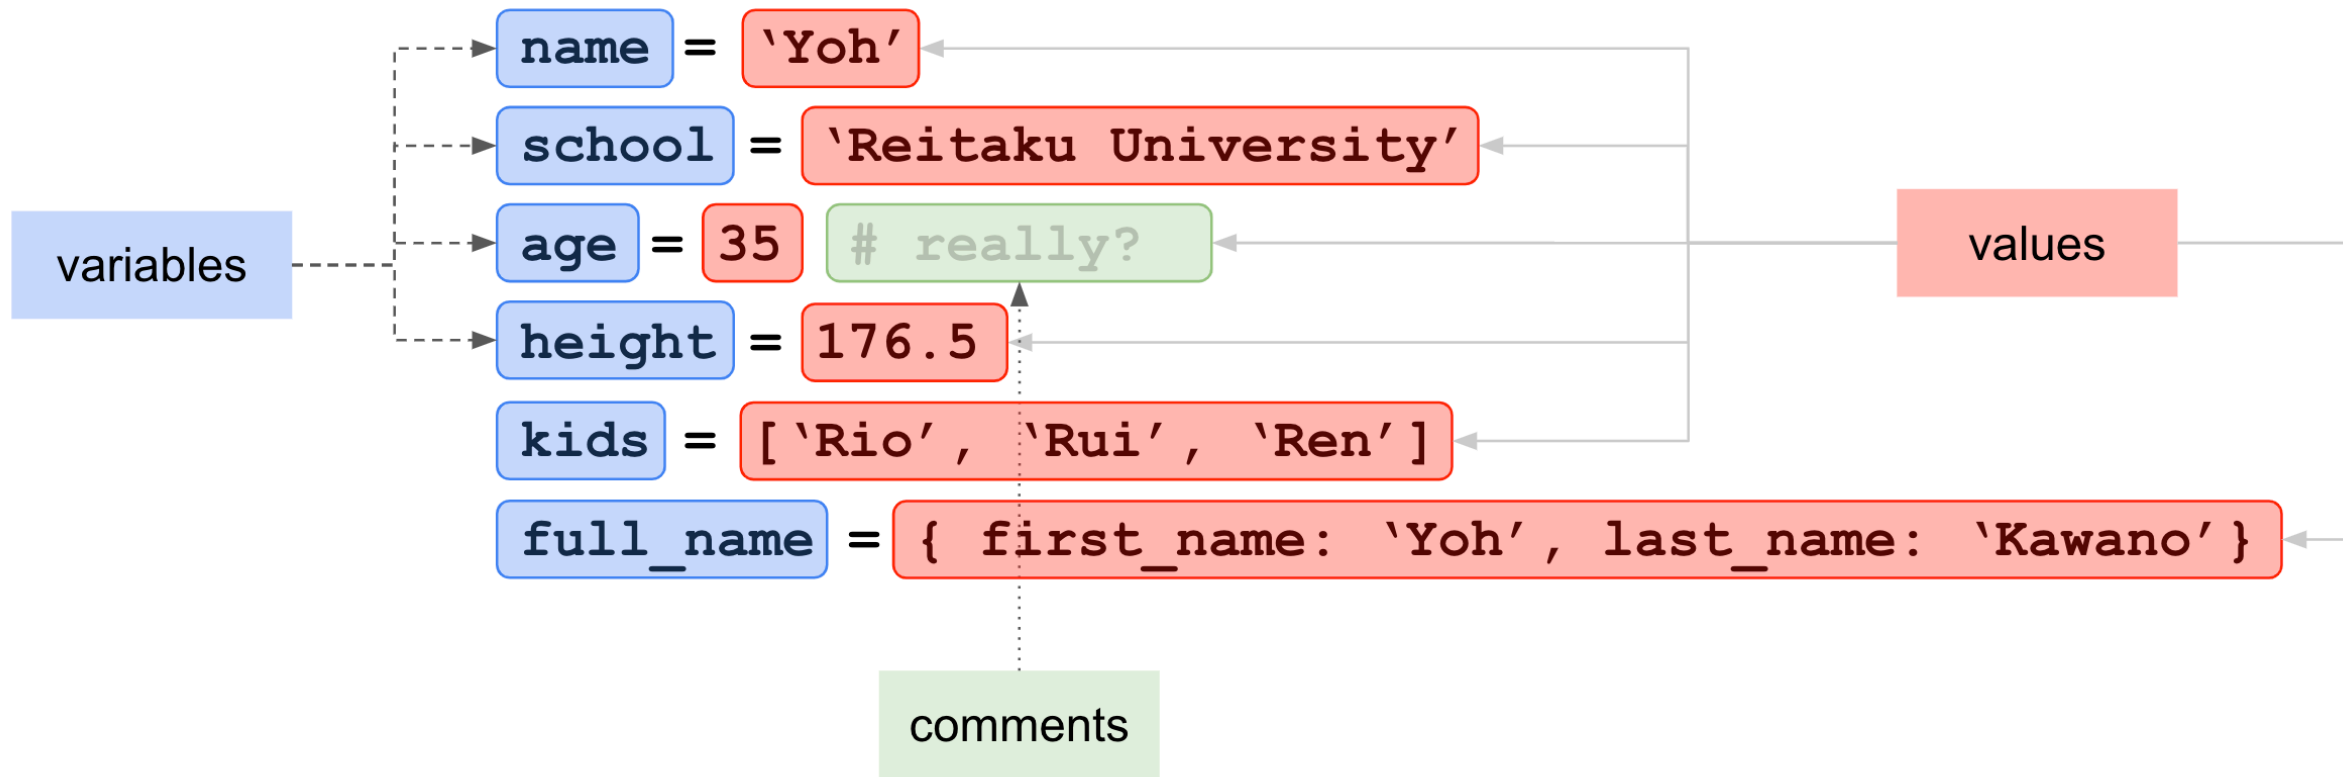

`age = 35 # really?`

`height = 176.5`

`kids = ['Rio', 'Rui', 'Ren']`

`full_name = { first_name: 'Yoh', last_name: 'Kawano' }`
